A5M is a part of a world wide collective dedicated to the advancement of therapies related to the science of longevity medicine.

A5M seeks to educate physicians, scientists, health care professionals and members of the public on anti-ageing issues.

A5M aims to disseminate information concerning innovative science and research as well as treatment modalities designed to prolong the human life span.

## Anti-Ageing Medicine

Anti-ageing medicine is a medical speciality, founded on the application of advanced scientific and medical technologies for the early detection, prevention, treatment and reversal of age related dysfunction, disorders and diseases. It is a healthcare model promoting innovative science and research to prolong healthy human lifespan. Anti-ageing medicine is based on principles of sound and responsible medical care that are consistent with those applied in other preventive and restorative health specialties.

The phrase "anti-ageing" is, as such, a euphemism for the application of advanced biomedical technologies focused on the early detection, prevention, and treatment of ageing related disease.

### A5M is officially affiliated with the:

- American Academy of Anti-Aging Medicine
- European Academy of Anti-Ageing & Aesthetic Medicine
- European Society of Anti-Ageing Medicine
- International Chiropractors Association
- International Hormone Society
- Korean Academy of Anti-Ageing Medicine
